Rhinestone garment design and production software that will have your customers...

OOOOOOOO’ing and AHHHHHH’ing

SignLab OOBling Pro, Rhinestone Decorating Made Easy

The boundaries of garment decorating are expanding daily. CADlink Technology Corporation, the world leader in developing software for this industry provides yet another leading edge software package that unleashes the creative capabilities of garment decoration using rhinestones and other heat transferred decorations.
Incredible Pre-packaged Font and Clipart Selection

Over 1300 decorative fonts to choose from including 35 single line fonts that enable the creation of rhinestone text in seconds!

Over 75 pieces of “ready to stone” vector clipart included in every OOBling package.
Design and Production Features: Get What You See!

Replace objects by rhinestones. Convert designs created in any other design applications into rhinestone patterns quickly and easily.

Realistic rhinestone preview that simulates your design as it will look following production.

Get all the details. Each design includes an automatic rhinestone piece count and costing feature that can be easily forwarded within a price quote to your customer.

Cover all the bases. Create design stencils on most popular vinyl cutters, engravers or laser cutting systems.

One smart system. Multi colored designs automatically sorted and stencils cut by color.

Mix and match printed images onto garments with rhinestones. Automated rhinestone outline creation around printed graphics.

Simplified Vectorization of Bitmaps. Easy step by step process that converts bitmap images into crisp. Clean vectors. Includes accurate centerline vectorization for quick application of rhinestone patterns.

Works well with others. Work easily with files created in other design applications. Includes quick short cut button that accepts files instantly from Corel Draw and .pdf support.

Dozens of special effect tools including outline shadow effects, fit text to any path or object and many, many others.
General Features
