### Water Transfer Material for Glass and Ceramics

We are now offering this glossy, clear transfer material so you can create your very own water slide decals with your solvent or color laser printer. Water Transfer Printing provides a way to decorate many kinds of materials, such as ceramic, glass and other non-porous surfaces. This is a very easy method for embellishing many types of promotional products.

For ceramic, glass and other non-porous surfaces.

Print and cut this material in right-reading.

Soak in water for 20-30 seconds or longer for better peeling.

Slide off one corner of decal & place on object. Slide backing out from behind decal & hold it gently patting off water with damp sponge. **Avoid stretching!**

Let dry. For extra durability, bake at 350°F for 5 minutes.

Dishwasher Safe

**\*\*** If using a color laser printer, you must print then cut decals out with scissors
