Using Crello, GO Templates and GO ET-DS

How to use Crello Design Software and Graphics One product templates for sublimation

This bulletin describes the procedure on using Crello Design Software and a template for sublimation applications.

Note: Crello for Desktop is used for this document. For Crello Mobile is a separate document

1. Open Crello from your web browser. https://crello.com

Choose the Design Format

The design page will be created.

In the Left side of the page you can see the elements tools, that can be used to select new elements for your design.

Once the Template is loaded, click on it, and will show up on your page.

With the arrows in the corners, rotate and enlarge the template, to match your page.

You can insert your own images to your design as we did before or select Photos from the Tool Bar.

From the premium tab you

have access millions of images included in your subscription.

Seach yor image and as soos as you click on it, will appear on top of the template

< □

Use the transparency tool so the Template can be visible and you can place it on the correct position.

Note: Is a good practice to overlap the design over the template, this way on the transfer process, no white borders show up in the product.

Use the Text tool in the Tool bar to add a text to your design.

It can be your own text or you can use any of the text template available.

You can customize the text you insert

Select the font, color, size and place your text. Text can be rotated as needed

If the design is ready, click on the template and delete it. We dont need it for our final print.

Use the transparency tool and set it up to 100 in order to have the image in full color.

Use the Download button to download your file.

PNG, JPG, PDF are options to download your design.

If you want to use an ICC color profile, we recommend PNG or JPG

Save your Design in your computer hard drive.
