## Using GO Templates and SubliMate™ Ink

How to use Graphics One product templates for sublimation

This bulletin describes the procedure on using a template for sublimation applications.

**Note:** The images are from InkScape software but same procedure can be used on CorelDraw, Illustrator, Silhouette Studio and others.

Import the image you will use with the Template.

Use the Template as reference to position your image.

Once the first image is in place, create all duplicates (Copy-Paste/Dulicate) or the different images you plan to print and transfer.

**Note:** While placing the images on the template, remember to overlap and have a bleed over the product guide, this way you have a slightly larger image and no white will appear on transferring.

Once everything is in place, select the template layer and erase it. Once is erased send your file to **Print** (File Menu/Print).
