

Specialty Materials™

A FULL LINE OF DIGITAL PRINTING AND PLOTTER CUT FILMS FOR TEXTILE DECORATION

DecoPrint™

DecoPrint is a thin, thermo-adhesive film made from 100% polyurethane. This material is made for solvent/eco-solvent digital printing. The special structure of the receptive layer, whether a matte or gloss finish, provides for high definition prints. Due to the absorbency of this receptive layer, it is necessary to use color profiles and amounts of ink different from those normally used for printable media.

* Starred colors require a high tack transfer mask. We recommend using our TM-850 Clear Transfer Mask to transfer the image.
Handle the Silver Gloss CJM-2325 with care - Use gloves to avoid leaving oils from hands on material.

For most fabrics.
NO Nylon.

Print and cut this material in right-reading

We recommend you use our Special 854 Transfer Mask to transfer the image

302°-320°F

Medium, even pressure.

15-20 seconds

Peel Cold

Wash inside out on gentle cycle in cold water, tumble dry. Not suitable for dry-cleaning or bleaching.

All technical information and recommendations are based on tests we believe to be reliable. However, we cannot guarantee performance for conditions not under manufacturer's control. Before using, please determine the suitability of product for its intended use. The user assumes all risk and liability whatsoever in connection with the use of this product. Seller's and manufacturer's only obligation shall be to replace such quantity of the product proved to be defective by manufacturer.
